- $100

Upgrade Your Inspection Capability.

Exchange Any Qualifying Dual-Element UT Probe And Receive $100 USD Off A Qualifying HS582i Purchase.

Upgrade to HS582i and take advantage of proven high-temperature ultrasonic technology with broad compatibility across commercial gauges and flaw detectors.

hotsensell® | Powered by ionix

Why Inspection Teams Choose HS582i

- **Built on the award-winning HotSense™ ultrasonic platform**, powered by proprietary Ionix HPZ piezoceramic technology.
- **Continuous operation from -55 °C to +350 °C (-67 °F to +662 °F)** with no cooling or duty cycling required.
- **Enhanced wear resistance** for demanding inspection environments and applications, including AUT scanning.
- **Stable, high-sensitivity signal performance** for reliable, repeatable measurements and improved confidence.
- **Broad compatibility with commercial gauges and flaw detectors,** supporting wall thickness measurements from 2.5-50 mm.
- **Compliant with ISO 22232-2 and ASTM E1065** inspection standards.

Upgrade In 3 Simple Steps

1. **Register Your Exchange:** Scan the QR code to register your exchange and receive your registration receipt. Participants may exchange up to 10 qualifying transducers per registration.
2. **Return Your Existing Transducers:** Return your qualifying dual-element UT transducers, regardless of manufacturer or model, together with your registration receipt through your local participating distributor.
3. **Receive Your HS582i Upgrade:** Receive **$100 USD off** each qualifying HS582i purchase and upgrade to proven HotSense™ technology.

Terms & Conditions

- Offer limited to **10 transducers per participant.**
- Transducers submitted for exchange must be capable of producing a **valid A-scan** when connected to a compatible gauge or flaw detector.
- Transducers for exchange must be received by receipt no later than 30 November to qualify.
- HS582i units are typically available within 24 hours of receipt of a valid purchase order; however, lead times of up to 4 weeks may apply depending on stock availability and regional fulfilment requirements.
